What The Editor is Expected to Do. The editor of a country news-

paper has no business to make mistakes; has no business to ever get anything in his paper that people do not like. He ought to know just what would suit each individual, or he ought to take each item before it is published and let the person whom it concerns censor it. An editor has plenty of time to do all this, as all he has to do is to hunt news and clean rollers, set type, wash forms, clean the floor, pen short items, hustle for advertising, fold papers and write wrappers, talk to visitors, and distribute type, read proof W. Elkin were in Mt. Sterling and correct mistakes, dodge bills and dun the delinquents, and take cussings and tell the subscribers that he needs money. An editor has no business to make mistakes while attending to little trifles like in front of W. R. Cassidy's store these, and living on oxtail soup flavored with imagination, wearing old shoes and no collars, a patch on the equator of his trousers and at the same time turn a TWICE-a-Week smiling countenance on the man The mill was closed down a who tells him that his paper isn't worth the subscription price, and that anyone could print a better paper with his eyes shut.

Four hundred and fifty-two thousand children (under twenty-one years old) were arrested in this country during one year's time, at an expense of over \$10,-J. B. Hall, of the Climax Stave 000,000. The average cost of cost \$500,000,000 to build the prisons of the United States, and maintenance costs between \$50, 000,000 and \$75,000,000 per year.
